

Del Monte UK Carbon Reduction Plan

Supplier name: Del Monte (UK) Ltd.

Publication Date: 20th April 2026

Commitment to achieving Net Zero

Del Monte (UK) Ltd. Is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations.	
Baseline year emissions: 2019	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	265 MT CO ₂ e (base year 2019)
Scope 2	1,389 MT CO ₂ e (base year 2019)
Scope 3 (Included Sources)	N/A
Total Emissions	1,654 MT CO₂e (base year 2019)

Current Emissions Reporting

Reporting Year: 2024	
EMISSIONS	TOTAL (tCO₂e)

Scope 1	630 MT CO₂e
Scope 2	1,374 MT CO₂e
Scope 3 (Included Sources)	N/A Current Year (2025) Scope 3 data will be available by the end of May 2026.
Total Emissions	2,004 MT CO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that by 2030 carbon emissions will decrease by 25% v the Baseline.

Progress against these targets can be seen in the table below:

Emissions have increased in the short term due to expansion of our manufacturing facilities and business growth. The plans to build an Anaerobic digestion plant this year will enable us to significantly reduce the emissions in future years and will generate carbon credits.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline.

1. All perimeter and facility lighting at the Wisbech facility has been converted to LED.

In the future we hope to implement further measures such as:

1. We have applied for planning permission to build an Anaerobic Digestion plant on our owned land alongside the Wisbech manufacturing facility to process all fruit waste from the UK fresh cut fruit facility. Our goal is to be live during 2027 year, with the plant providing renewable green energy for the manufacturing facility.
2. Our latest generation 2 vehicles provide Co2 emission reductions and the option to use HVO vegetable oil that we will transition towards, as well as explore the use of electric vehicles subject to range improvements.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Date: 21st April 2026.
